

Doofenshmirtz Evil Incorporated

Vendor and Procurement Policy — Version 2.0

1. Purpose

Version 2.0 lowers the three-quote threshold and adds a sustainability rule, after Procurement discovered that 70 percent of inator parts were being bought from a single cousin.

2. Scope

This policy applies to every purchase made with company money, from staplers to shrink rays.

3. Approved Vendors

3.1 Vendor List. Purchases should be made from the approved vendor list, which includes Evil Supplies Depot, Lasers R Us, and Gary's Discount Self-Destruct Buttons.

3.2 New Vendors. A new vendor must pass a background check and confirm in writing that it is not a front for O.W.C.A.

4. Quotes

4.1 Three-Quote Rule. Purchases above 2,500 dollars now require three written quotes, down from 5,000 dollars. Quotes from relatives of the buyer do not count.

4.2 Sole Source. Single-vendor purchases require written approval from Procurement and a one-paragraph explanation of why nobody else sells that crystal.

5. Payment Terms

Vendors are now paid within 30 days of invoice. Payment in captured platypuses remains prohibited.

6. Sustainable Evil

At least one in five inator parts must be recycled or refurbished. Parts salvaged from inators destroyed by Perry the Platypus count toward this target.

7. Acknowledgment

Anyone who buys anything acknowledges this policy, especially the person who bought forty rubber chickens last spring.
